

CPD Group Report for AGM 2010

The SHINE CPD group aim to provide members with up to date visits, training, workshops and study days to enhance and complement, but not duplicate, any training provided by our employers. In the past training was heavily subsidised by SHINE but in the current economic climate any training has to be self-financing.

As well as organising today's AGM & Study Day the group organised training in December 2009 on "Expert Searching to Targeted Health Audiences" with Terry Kendrick which was well received and an evening talk on "The History of Hospitals in Glasgow by NHS Archivist Alistair Tough.

We are always looking for suggestions for future events to satisfy our membership so please add any suggestions to the Evaluation Form.

My thanks go to Paul Manson of NHS Grampian for his assistance with this year's AGM and in particular to the current members of the CPD Group and their excellent event management skills. Even "volcanic ash" won't stop Catriona, Gerry, Christine, Jenny, Anne or Donna!!! If you or a staff member wish to join us you don't need to have any prior experience of event management already - just bring along your ideas, enthusiasm and organisational abilities.

Sandra Wilson, SHINE CPD Group Representative:
